

Great Connections:

Once we connect our three communities as a Great Place region, we will be able to connect to other adjacent regional trail systems.

Our goal is to expand west along the B40 River Bluffs Scenic Byway and then north to link to the Prairie Farmer Trail in Cresco. From here you will connect to the Root River Trail System. This 60-mile paved trail network attracts thousands of outdoor enthusiasts to southern Minnesota each season.

Extending The Turkey River Corridor Trail System south will take land trail adventurers from Elkader on to the Mississippi River Trail, a world-class bicycling route that travels from the headwaters of the Mississippi River at Lake Itasca, Minnesota to the Delta at the Gulf of Mexico in Louisiana.
